AUS920030249US1

AMENDMENT

Please amend the above-identified application as follows:

The listing of claims will replace all prior versions, and listings, of claims in the application:

<u>Listing of Claims</u>:

1. (Original) A method for evaluating a test action for a user, the method comprising

    creating, within a network, a user metric vector in dependence upon a plurality of disparate user metrics;

    selecting a test action in dependence upon the user metric vector;

    executing the test action within the network; and

    determining a user reaction.

2. (Original) The method of claim 1 wherein selecting a test action in dependence upon the user metric vector comprises retrieving an action ID from a test action list.

3. (Original) The method of claim 1 wherein selecting a test action in dependence upon the user metric vector comprises selecting an action ID in dependence upon devices in the domain.

4. (Original) The method of claim 1 comprising adding the test action to a user's action list in dependence upon the user reaction.

2

5.   (Original) The method of claim 1 comprising deleting the test action from an test action list in dependence upon the user reaction.

6.   (Original) The method of claim 1 wherein determining a user reaction comprises receiving a user instruction.

7.   (Original) The method of claim 1 wherein determining a user reaction comprises inferring a user reaction.

8.   (Original) A system for evaluating a test action for a user, the system comprising

      means for creating, within a network, a user metric vector in dependence upon a plurality of disparate user metrics;

      means for selecting a test action in dependence upon the user metric vector;

      means for executing the test action within the network; and

      means for determining a user reaction.

9.   (Currently Amended) The system of claim 18 wherein means for selecting a test action in dependence upon the user metric vector comprises means for retrieving an action ID from a test action list.

10.   (Currently Amended) The system of claim 18 wherein means for selecting a test action in dependence upon the user metric vector comprises means for selecting an action ID in dependence upon devices in the domain.

11.   (Currently Amended) The system of claim 18 comprising means for adding the test action to a user's action list in dependence upon the user reaction.

3

12.   (Currently Amended) The system of claim ~~18~~ comprising means for deleting the test action from an test action list in dependence upon the user reaction.

13.   (Currently Amended) The system of claim ~~18~~ wherein means for determining a user reaction comprises means for receiving a user instruction.

14.   (Currently Amended) The system of claim ~~18~~ wherein means for determining a user reaction comprises means for inferring a user reaction.

15.   (Original) A computer program product for evaluating a test action for a user, the computer program product comprising

       a recording medium;

       means, recorded on the recording medium, for creating, within a network, a user metric vector in dependence upon a plurality of disparate user metrics;

       means, recorded on the recording medium, for selecting a test action in dependence upon the user metric vector;

       means, recorded on the recording medium, for executing the test action within the network; and

       means, recorded on the recording medium, for determining a user reaction.

16.   (Currently Amended) The computer program product of claim ~~1~~15 wherein means, recorded on the recording medium, for selecting a test action in dependence upon the user metric vector comprises means, recorded on the recording medium, for retrieving an action ID from a test action list.

4

17. (Currently Amended) The computer program product of claim +15 wherein means, recorded on the recording medium, for selecting a test action in dependence upon the user metric vector comprises means, recorded on the recording medium, for selecting an action ID in dependence upon devices in the domain.

18. (Currently Amended) The computer program product of claim +15 comprising means, recorded on the recording medium, for adding the test action to a user's action list in dependence upon the user reaction.

19. (Currently Amended) The computer program product of claim +15 wherein means, recorded on the recording medium, for determining a user reaction comprises means, recorded on the recording medium, for receiving a user instruction.

20. (Currently Amended) The computer program product of claim +15 wherein means, recorded on the recording medium, for determining a user reaction comprises means, recorded on the recording medium, for inferring a user reaction.
